The Five Types of Scientific Enquiry

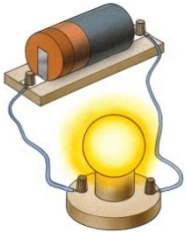

1. Observation (Over Time)

Observing how plants grow and change over time.

2. Grouping and Classifying

Sorting materials by what they are made of.

3. Pattern Seeking

The correlation between electricity and magnetism.

4. Research

Researching the human impact on the environment.

5. Fair and Comparative Testing

Testing the 'dunkability' of our favourite biscuits.

Are you using the full range of enquiry types?

Try to use as many of them as possible in every topic!
